PROJECTS

Supraskills TM

Supraskills TM is Flutter-based task management app with Firebase push notifications, Riverpod state management, Hive offline storage, calendar timeline with task scheduling, file/image upload and camera support, background downloads, internal messaging, localization, and Android/iOS native integrations.

Ready Classify

A customer-facing Flutter marketplace app providing Firebase authentication and messaging, social sign-in (Google/Apple), push and local notifications, secure local storage (Hive), REST API networking with Dio and logging, image picking and caching, maps and geolocation (Google Maps, geocoding, location), rich forms and validation, Riverpod state management, in-app webviews, real-time updates (Pusher), sharing, and device permission handling for a responsive, connected shopping experience.

Bridge LMS

Bridge LMS is a flutter application for mobile devices that serves as a client for a Learning Management System (LMS). Built using Dart, it aims to provide students and educators with easy access to online courses, educational materials, assignments, and progress tracking, interfacing seamlessly with LMS backend services for a complete digital learning experience.

EduMali

EduMali is a mobile learning management app that lets students browse and enroll in courses, stream or download video lessons, take quizzes and submit assignments, and track learning progress. Instructors can manage content, view analytics, and communicate with learners via messaging and push notifications. The app supports offline access, secure authentication, payments/enrollments, and integrations with backend services for real-time sync and reporting.

Chuty Rooms

Chutyrooms user app (Flutter) delivers room search, real-time availability, secure authentication, in-app booking and payments, interactive maps, push notifications, user profiles, reviews and ratings, booking history, filters and sorting, multilingual support, and responsive UI for seamless mobile reservation management across iOS and Android devices with offline access, analytics, and integrations.
